

THE PREDICTIVE INDEX LEARNING INDICATOR™

ASSESS NATURAL LEARNING ABILITY

The Predictive Index Learning Indicator™ is a proven, practical and reliable assessment of general cognitive ability that you can use to find out how quickly an individual can learn, adapt and grasp new concepts in the workplace.

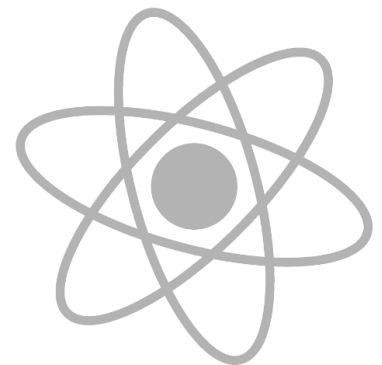

WHY USE COGNITIVE ASSESSMENTS?

Cognitive assessments strengthen talent decisions. They dramatically improve your odds of selecting individuals who can meet or exceed the expectations of a role or company.

Assessments such as the PI Learning Indicator are among the best predictors of training success and job performance across all industries.

SCIENTIFICALLY SUPPORTED

The PI Learning indicator is a scientifically validated measure of cognitive ability. It was built in accordance with strict standards set by organisations such as The International Test Commission (ITC), Society for Industrial and Organizational Psychology (SIOP), and the American Psychological Association (ASA).

QUICK FACTS

- The PI Learning Indicator is a **12 minute** timed assessment
- Factors assessed include **Numerical, Abstract and Verbal**
