

PI PROFESSIONAL SERIES™ WORKSHOPS

BECOMING A PI PRACTITIONER™

MAXIMISE BUSINESS PERFORMANCE WITH PI

Our two day *Becoming a PI Practitioner* workshop gives you the hands on training needed to tackle the people problems standing between you and your business objectives. Poor performance, mismanagement, low productivity, high turnover, low engagement - all of these issues can be addressed through the effective application of PI's human capital management methodology in your business.

PI IN BUSINESS STRATEGY

This workshop will teach you how to use the **Require, Hire, Inspire** framework so you can accurately define the true requirements of specific roles, hire top performers who fit your business and keep them engaged and inspired through the use of PI across the entire employee **life cycle**.

Learn a simple methodology that helps you understand your people so they can take you where you want to go:

- Identify a set of business challenges, uncover associated people issues and create goals to fix them
- Learn strategies that directly impact your challenges through the use of PI tools
- Leave with an action plan to overcome your challenges and achieve your goals

INSIDE THE WORKSHOP

This comprehensive two-day workshop includes a diverse set of learning and development activities including a case study, sample job assessment, personal reflection exercises, group discussions and the creation of detailed action plans.

WHO SHOULD ATTEND?

- Executives or managers responsible for business strategy, planning and success
- HR professionals who will serve as the PI expert and advisor in their organisation
- Any employee continuing their PI learning journey after attending another PI workshop
- Anyone looking to use PI address their day to day business challenges

The Becoming a PI Practitioner workshop includes materials from PI's *What Drives People?* and *Managing to Perform* workshops as an introduction to The Predictive Index system, leaving attendees with a broad knowledge of the methodology and practical applications.
